[How the rateable value is calculated , Hide](#)

Office valuations use measurements of the total usable area of each floor within the property. It includes the office and things like kitchens, corridors and entrance halls. It excludes things like lifts, toilets and cleaner's cupboards.

A property area is multiplied by a price per square metre, which is based on information about rents paid on the open market.

Features such as air conditioning and lifts may be shown separately in the valuation.

This property is part of [valuation scheme 291706](#) which includes a price for floor areas and property features.
